

MEETING THE PROJECT MANAGEMENT CHALLENGE

2004

Biography

Sandra L. Crowley

Configuration Management Specialist - Glenn Research Center (GRC)

Sandra Crowley is the Configuration and Data Management (CDM) Element Lead for the Space Launch Initiative's Advanced Engineering Environment Project. She leads a team whose objective is to define, communicate, and implement the principles of CDM in support of the Project's objectives. As a member of the Systems Engineering Division, she is the lead point of contact for CDM services on engineering projects at NASA's Glenn Research Center (GRC). She leads a Configuration Management Users Group that seeks to standardize and improve CDM functions at GRC. Trained by the Institute of Configuration Management, she received Configuration Management II Certification in 1990. Sandra is a member in good standing of the Association for Configuration and Data Management (ACDM)--an international professional organization--and has served as ACDM Vice President of Services and ACDM Secretary.
